Experienced in ERP operations using SAP and TCS iON, including invoice processing and operational data management. Proficient in Excel, SQL queries, and data visualization to generate actionable insights and support data-driven decision-making.

SKILLS

Data Analysis & BI: SQL, Power BI, Data Visualization, Dashboard Development, KPI Reporting, Data Modeling, Power Query, DAX

SQL: Joins, Subqueries, CTEs, Window Functions, Aggregations

Excel & Reporting: Advanced Excel, Pivot Tables, VLOOKUP, INDEX-MATCH, Data Validation, Conditional Formatting, MIS Reporting

ERP & Operations: SAP, TCS iON, Invoice Processing, ASN Upload, e-Way Bill Generation, Sales & Dispatch Operations

Business Analytics: Data Cleaning, Data Transformation, Reporting & Analytics, Operational Analytics, Business Decision Support

PROFESSIONAL EXPERIENCE

Sales Data Associate

Dighvijay Plastics & Allied Products Pvt. Ltd | Bengaluru | Mar 2026 – May 2026

- Processed 50–80 daily invoices in TCS iON, ensuring accurate transactional and sales data management
- Generated e-Way Bills for shipments while maintaining GST compliance and dispatch tracking
- Managed ASN uploads and downloaded production schedules using SAP ERP workflows
- Reduced invoice discrepancies by 10–15% through data validation and reconciliation processes
- Maintained structured sales and dispatch records for reporting and operational tracking
- Coordinated with sales, logistics, and accounts teams to support timely order fulfillment

System Operator – Data & ERP Operations

Kems Forgings Pvt. Ltd | Bengaluru | Feb 2025 – Feb 2026

- Managed and validated 1,000+ monthly records across production, inventory, and dispatch
- Improved data accuracy by ~20% through validation and reconciliation processes
- Created Excel-based MIS reports for inventory tracking and production planning
- Identified and resolved operational data inconsistencies through cross-functional collaboration
- Supported reporting workflows and operational data management processes

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Sri Sairam College of Engineering | 2019 – 2023

PROJECTS

E-Commerce Pricing & Revenue Analysis | SQL, Power BI

- Analyzed 36 months of e-commerce sales data to identify revenue trends and customer behavior
- Cleaned and transformed 10,000+ records using SQL for reporting and analysis
- Used window functions and aggregations to calculate MoM growth and revenue insights
- Built interactive Power BI dashboards tracking 5+ business KPIs and regional performance
- Generated data-driven insights supporting pricing optimization and business decisions

Spotify Data Analysis & Insights | SQL

- Structured and normalized Spotify datasets to improve reporting efficiency
- Optimized SQL queries, reducing execution time by approximately 40%
- Used CTEs, joins, and window functions to analyze engagement trends
- Generated insights on streaming performance and user behavior
